

The Certified Six Sigma Yellow Belt (CSSYB) is new to the world of Six Sigma and has a small role, interest, or need to develop foundational knowledge. Yellow Belt can be entry-level employees who seek to improve their world or eager to be champions who require an orientation of Six Sigma and the define, measure, analyze, improve, and control (DMAIC) model. This certification adopts the approach of advancing the concept and potential of using Six Sigma tools and methodologies within an organization.

Employees are responsible for DMAIC projects, although they may not be the project leader. They may be responsible for data collection, data analysis, and process control. Employees are responsible for identifying process inefficiencies and opportunities for improvement. Employees are responsible for identifying process inefficiencies and opportunities for improvement. Employees are responsible for identifying process inefficiencies and opportunities for improvement.

Employees are responsible for identifying process inefficiencies and opportunities for improvement. Employees are responsible for identifying process inefficiencies and opportunities for improvement.
