

Purpose of the Master of Science in Nursing Program

The program is designed to prepare nurses for current and emerging roles in health care delivery, who are equipped with advanced nursing knowledge for improving health outcomes. The program prepares graduates with the competencies to engage in higher level nursing practice and leadership in a variety of roles and settings.

Master of Science in Nursing (MSN) Program Outcomes

Upon completion of the program the graduate is prepared to:

1. Integrate knowledge from nursing and other disciplines to provide evidence-based care to diverse populations at an advanced practice
